

DevCon & SECURITY SUMMIT

2024 KICKOFF

MEET YOUR COMMUNITY & ELEVATE YOUR TECH GAME

08:00		CHECK IN, BREAKFAST & MINGLING		MAIN STAGE	
09:00		Welcome to Lynx DevCon & Security Summit 2024 Kickoff Conference MC & Ben Pelled, Lynx by People & Computers		10:10	<div>Panel Discussion</div> <div>Option 1: Demystifying AI in Development: Friend or Foe Artificial intelligence is rapidly transforming the software landscape, but developers face crucial questions. Can AI augment human capabilities or replace them? How can we leverage AI ethically and responsibly? Join a panel of experts to explore the future of AI-powered development, its challenges and opportunities, and its impact on the developer workforce.</div> <div>Option 2: Building Bridges, Not Walls: Securing a Fragmented Cloud Landscape With the rise of multi-cloud and hybrid environments, securing data and applications has become increasingly complex. This panel discussion will dive into strategies for managing security across diverse cloud platforms, building trust and collaboration between developers and security teams, and navigating the ever-evolving threat landscape.</div>
09:10		From Launch to Moonshot: Igniting Your Development Journey in 2024 Uncover disruptive trends, embrace emerging technologies, and chart your course for a groundbreaking year of innovation			
09:25		Mind Meld with the Machine: Demystifying the Rise of AI-Powered Development Explore how AI is augmenting developer capabilities, automating tasks, and unlocking new possibilities for creativity.			
09:40		Redefining the Code Frontier: Pushing the Boundaries of Software Development Dive into next-gen architectures, explore uncharted territories in AI and shape the future of building better solutions.			
09:50		From Lone Wolf to Pack Leader: Fostering a Collaborative Culture of Development Break down silos, build strong teams, and leverage the power of community to achieve more, together.			
11:00		COFFEE BREAK	DEV STAGE	SECURITY STAGE	
11:30		From Launch to Moonshot: Igniting Your Development Journey in 2024 Uncover disruptive trends, embrace emerging technologies, and chart your course for a groundbreaking year of innovation		11:30	Beyond the Breach: Reimagining Resilience in a Hyperconnected World Uncover innovative strategies for building agile defenses, navigating cyber warfare, and thriving in the face of inevitable attacks.
11:45		Mind Meld with the Machine: Demystifying the Rise of AI-Powered Development Explore how AI is augmenting developer capabilities, automating tasks, and unlocking new possibilities for creativity.		11:45	Hunting in the Shadows: Unveiling the Art and Science of Advanced Threat Detection Dive into the world of elite threat hunters, learn cutting-edge detection techniques, and discover how to stay ahead of cyber adversaries.
12:00		Redefining the Code Frontier: Pushing the Boundaries of Software Development Dive into next-gen architectures, explore uncharted territories in AI and shape the future of building better solutions.		12:00	Human Error: The Achilles' Heel of Security? Building a Fortress of Awareness Explore the role of human psychology in security breaches, and equip individuals with the knowledge and skills to become the first line of defense.
12:15		From Lone Wolf to Pack Leader: Fostering a Collaborative Culture of Development Break down silos, build strong teams, and leverage the power of community to achieve more, together.		12:15	AI & Security: Friend, Foe, or Fusion? Navigating the Ethical and Technological Frontiers Delve into ethical complexities: examine AI's potential for good and bad, and chart a course for responsible development in this critical domain.
12:30		From Lone Wolf to Pack Leader: Fostering a Collaborative Culture of Development Break down silos, build strong teams, and leverage the power of community to achieve more, together.		12:30	Privacy Paradox: Balancing Innovation with Individual Liberty in the Digital Age Unravel the relationship between technological progress and personal privacy: explore secure systems that empower individuals.
12:45		Panel Discussion > Building Bridges, Not Walls: Securing a Fragmented Cloud Landscape With the rise of multi-cloud and hybrid environments, securing data and applications has become increasingly complex. This panel discussion will dive into strategies for managing security across diverse cloud platforms, building trust and collaboration between developers and security teams, and navigating the ever-evolving threat landscape.		12:45	Panel Discussion > Collaboration is Key: Breaking Down Silos to Build a Unified Security Front Effective security requires cross-functional collaboration. This panel will bring together experts from diverse fields – IT, HR, legal, and even marketing – to explore strategies for breaking down communication silos, fostering a culture of shared responsibility, and achieving holistic security across all levels of an organization.
11:00		NETWORKING LUNCH
